NAVSON TECHNOLOGIES
Research meets industry

LETTER OF RECOMMENDATION

Date: August 21st, 2026

TO WHOMSOEVER IT MAY CONCERN

I am pleased to recommend **Mr. Nandha Gopal M**, who worked with **Navson Technologies Private Limited, Chennai, India** as an **Embedded Engineer Intern** from **June 10th, 2026 to August 10th, 2026**.

During his internship, he gained valuable hands-on experience in **Embedded Hardware, Firmware Development, HMI, System Testing and Troubleshooting of Industrial Automation Systems**. He was involved in supporting and troubleshooting previously deployed gantry-based systems, working across hardware, firmware and HMI levels to identify and resolve technical issues.

His responsibilities included **Hardware-level Diagnosis, Sensor and Actuator Troubleshooting, Wiring and Signal Verification, Firmware Debugging, Embedded Code Analysis, Control-logic Troubleshooting and HMI-level Testing and Validation**. He was able to systematically trace issues across different layers of the system and determine whether the root cause was related to hardware, firmware, sensors, communication or HMI functionality. He also worked with **Microcontroller-based Embedded Systems, Embedded C/C++ Programming, Sensor Interfacing, GPIO, PWM, UART/Serial Communication, Motor Control, Relay Control and HMI Interfaces**. His practical exposure to both hardware and software enabled him to understand the complete interaction between the machine hardware, embedded firmware and user interface.

A key strength of Mr. Nandha Gopal M was his ability to troubleshoot real-world industrial Embedded Systems. He demonstrated a structured approach to identifying problems, testing

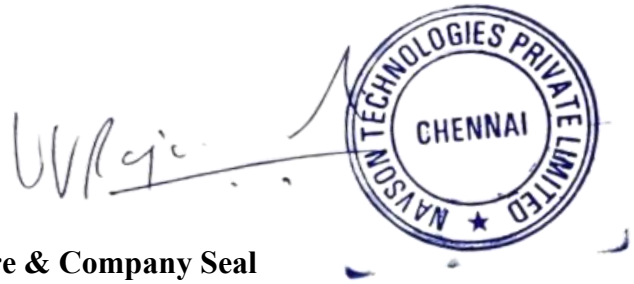

individual components, analyzing firmware behavior, validating HMI functionality, implementing corrective changes and verifying the system after troubleshooting.

Throughout his internship, he demonstrated **problem-solving ability, technical curiosity, adaptability, responsibility and willingness to learn**. He was comfortable working with existing systems and codebases and showed the ability to understand and troubleshoot complex hardware-software interactions.

Based on his hands-on experience and performance, I confidently recommend **Mr. Nandha Gopal M** for opportunities in **Embedded Systems, Firmware Development, Embedded Hardware, HMI Development, Industrial Automation, IoT and Control Systems**. I wish him continued success in his future academic and professional career.

Sincerely,

Rajasekhar V V,
Director
